CBT - From Tease to Torment to Torture

Over Clothes

- pass and grab
- bump and grind
- that special hug
- it's never too early for a good mind-fuck - as long as you don't scare him off before we get started
- undressing can be incredible fun

Structures and sensitivities

- penises are resilient but can be broken - and can break things
- tip can be extremely sensitive, especially if the foreskin is intact
- scrotum (sac)
 - stretchable
 - resilient
 - not overly sensitive
 - generally enjoys the same things the labia enjoy
- testicles (balls)
 - generally very sensitive (think of the poking part of a pelvic exam)
 - impact here can be dangerous

Silly play

- penis puppets
- clothes
- silly songs
- tricks
 - twirling
 - slapping
 - bouncing
- whirlygig

Impact play

- flogging
- caning
- single tail or diaper
- slapping
- punching
- rubber bands
- basically anything he likes and can handle on the cock
- heavy impact on the balls is potentially dangerous, even if he likes it

Leash, collars & leads

- fun of leading around by his cock
- cock rings & vacuum pumps
- hair ties, rubber bands, etc.
- dangers of leashes & suspensions

Clip & clamps

- size matters
- mouse traps
- weights

Bondage & chastity

- simple rope bondage
- chastity cage
- humbler

Irritants

- textures
- hair pulling and/or plucking
- spices & oils
- hot and cold
- wax
- fire

Sticky situations

- knives
- glue
- duct tape

Ballbusting & scrotum play

- dangers
- squeezing vs crushing
- trampling
- stretching, weights, parachutes
- vacuum
- stitching - the quick gender modification
- butterfly boards
- inflation & infusion

Electric play

- tens units
- stinger
- dog collar
- taser & mind-fuck
- insertable electronics
- violet wand

Sounds and other insertables

- anything other than medical quality sounds should not be in the urethra
 - ice
 - knitting needles
 - figging, i.e., ginger and other burny things
 - other household objects
- electricity & why not to do it
- dangers
 - infection
 - urethral puncture
 - urethral scarring
- see Urethral Sounds handout for full details on playing with sounds

Needles

- subcutaneous vs through structures
- glans, shaft or scrotum
